#COVID-19 Coronavirus2020

March 20/2020

- This is the genesis. A new world is unfolding. From water we are developing limbs. We have the new sun, moon, air, soil, water, fire, environment; we must create a caring, loving and kind world. As such our DNA will conform, our organs must conform. Economies and business in general to conform. A change which is natural yet painful. We replace fear with love. Receive then this assurance that we will overcome this plague. #COVID-19 #coronavirus2020
- With this song; Amapola, we raise quick recovery and complete healing.
- Happy 😊 Equinox, Happy 😊 Spring 🌻🌸
- Take Care of yourselves, take care of one another and protect yourselves!
- We are with you, interceding for you. We love you.

Fins Evolved Into Hands & Feet

- Speech Language “Letter N” brings with it the power of transition from water into dry land. Ancient fish desire to take their first steps onto land helped in the fish fins transformation into fingers and toes evolved our arms and legs.
- This ancient knowledge and studies have been conducted to find out how it happened. According to a study of Shubin, we first need to know about a group of genes called Hox. They conduct the opera of animal growth, telling other genes when and where to activate, to build the right organs in the right place. They line up in orderly rows, so that those that coordinate the building of heads sit ahead of those that dictate the sculpting of tails. And they have counterparts in many different animals: the head-building Hox genes of flies are related to those of mice, which suggests that most animals rely on a common toolkit of body-building genes that we all inherited from a shared ancestor.
- In 1996, French scientists showed that two genes in this group—Hoxa13 and Hoxd13—control the development of hands and feet in mice. When they deleted these genes, rodents would grow up with limbs that ended in stumps. No paws. No digits.
- For Shubin, that discovery was thrilling. In 2013 he knew that the legs of mice and other four-legged animals evolved from the fins of fish, and he knew that fish have counterparts of Hoxa13 and Hoxd13.

Alphabet Letter N

Fins Evolved Into Hands and Feet

- Using a technique that automatically adds glowing red molecules to any cell that activates Hoxa13—essentially, painting them for easy identification. In mice, this method only paints bone-making cells in the wrist—all of these cells, and only these cells, go on to build the bones of hands and digits.
- Think about a fish's pectoral fin—the one that sits behind its head. The fleshy base contains several bones that are related to those in your arms. But there's nothing that quite matches your hands and fingers. The long, thin, parallel bones in the rest of the fin—the fin rays—look metaphorically like fingers, but they're made from a different kind of bone, and they grow in a totally different way.
- So scientists, Shubin included, believed that our hands and digits did not evolve from fin rays. Instead, they either evolved from some small bones in the fleshy base of the fin, or were a totally new evolutionary innovation with no predecessors.

The Fin-to-Limb Transition

- “It’s an unexpected finding that really adds a new level of clarity to the fin-to-limb transition,” says Tabin from Harvard Medical School. “But it doesn’t mean that fin rays are the equivalent of digits, or the ancestral structures that gave rise to digits.” The reality, as with much of biology, is more complicated.
- Shubin thinks that as a fish’s fin grows, cells in its base activate Hox genes and move outwards, creating the fin rays. Delete those genes and the cells don’t migrate, making shorter rays. And that’s sort of what happened as fish made the move to land and fins evolved into limbs: those Hox-activating cells stayed put and shifted from making fin rays into making digits.
- If that’s right, then our hands and feet weren’t evolutionary novelties at all. They were built using the same cells and the same genetic programs that had been crafting fins for millions of years. Those cells just started doing what they do in a new setting. “It’s not saying that fin rays and digits are the same thing,” emphasizes Kimberley Cooper from the University of California, San Diego. “But there was so much talk about how they are different, and at a fundamental ancient level they’re more similar than we appreciated.”
- “It shows us how bodies are built,” says Shubin. “By understanding the biology of fish, we understand the basic architecture of our bodies, and how genes and cells interact to build us, and how we evolve.”

- An artist's reconstruction of the extinct fish *Elpistostege watsoni*, which lived about 380 million years ago in what is now Quebec, Canada, is seen in this illustration released to Reuters on March 18, 2020.
- Inside the stout fins of a fish that prowled the shallow waters of an estuary in what is now eastern Canada about 380 million years ago, scientists have found what they call the evolutionary origins of the human hand.
- The researchers examined a remarkably complete fossil of a fish called *Elpistostege watsoni* that represents a pivotal stage in a landmark event in the history of life on Earth – the transition of fish to land vertebrates.
- For this to occur, anatomical changes were needed including the evolution of hands and feet. Inside the tip of *Elpistostege*'s front fins – called pectoral fins – were tiny bones called radial bones arranged in a series of rows like digits – the precursor to fingers. These would have provided the flexibility for *Elpistostege*'s fin to bear weight on land.
- “By looking at *Elpistostege*, it is important to realize that we, as human beings, are coming from a long line of evolution, that every part of our body, like our fingers, has a long evolutionary history,” said paleontologist Richard Cloutier of Université du Québec à Rimouski in Canada, lead author of the research published in the journal *Nature*.
- “This is true for *Homo sapiens* but it is also true for all living organisms,” Cloutier added.
- This marks the first time such traits have been found in a fish rather than in the earliest amphibians – the first land vertebrates – that later evolved from fish with sturdy fins like *Elpistostege*. It had two explicit digits and three other apparent digits.
- More than five feet (1.6 meters) long, *Elpistostege* was primarily aquatic, with a crocodile-like body shape and flat triangular head, eyes atop the skull and numerous teeth around the jaws and in the palate. Its slender body was covered in thick scales and it had well-developed fins. It likely was the top predator in its brackish estuary ecosystem during the Devonian Period.
- It is unclear whether it occasionally emerged onto land, but the structure of its fins would have enabled it to do so, said paleontologist and study co-author John Long of Flinders University in Australia. Its digits were still contained within the fin and not yet free moving like fingers.
- *Elpistostege* was known only from partial fossils until this one was found in Miguasha National Park in Quebec province.
- The four-limbed land animals that evolved from fish like *Elpistostege* are called tetrapods, a group now spanning amphibians, reptiles, birds and mammals including humans.
- The digits of the 30,000-plus living species of tetrapods all share the same basic pattern found in *Elpistostege*. Like other similar fish, *Elpistostege*'s fin also has the precursors of tetrapod limb bones including the upper arm, forearm and wrist.

March

- 11:11 on March 11 /2019 we made the entrance into the door or gate “Letter “N”
- The vision was clear: Letter D (as water droplets 💧) the center began to create letter C which created an overall image of € sign within (or enclosed inside letter D)

- March is the seasonal equivalent of September in the Southern hemisphere; the beginning of autumn.
- January became the first month of the calendar year around 700 BCE. Although January 1st is New Year's Day, many cultures and religions still celebrate the beginning of the new year in March.
- March is in fact our 8th Month.
- March symbols:

The emerging offspring is about half the size of the mother.

The Caribbean Island of Barbados

- Letter N: March -spring equinox letter the cobra snake 🐍 Nyoka- Ndjet.

- However, the name for the letter N in the Phoenician, Hebrew, Aramaic and Arabic alphabets is nun, which means "fish" in some of these languages. The sound value of the letter was /n/—as in Greek, Etruscan, Latin and modern languages.
- Letter N is from water to land.
- The Barbados threadsnake (*Tetracheilostoma carlae*) is a species of threadsnake. It is the smallest known snake species. This member of the Leptotyphlopidae family is found on the Caribbean island of Barbados. It has been reported to be on the islands of Antigua and Barbuda.

Oh Great Mother omnipotent, oh Holy-Ghost, the searcher of hearts, oh you three in persons, one true godhead in substance, which didst spare Eva and Adamu in their sins; oh thou daughter, which died for their sins a most filthiest [disgraceful] death, sustaining it upon the holly ankh; oh thou most merciful, when I flee unto thy mercy, and I beseech thee by all the means I can, by these the holly names of thy daughter; Alpha and Omega, and all other of Her names, grant me thy virtue and power, that I may be able to seat before me, thy spirits which were thrown down from heaven, & that they may speak with me, & dispatch by & by without delay, & with a good will, & without the hurt of my body, soul, or goods.

Bird of Paradise

- The bird of paradise flower meaning includes joy and paradise, as it is the quintessential tropical flower. It originates from South Africa, where it is also nicknamed the Crane Flower.
- This flower has been grown at the Royal Botanic Gardens in Kew, South Africa since 1773. The scientific name for the bird of paradise is *Strelitzia reginae*, which was named by Sir Joseph Banks, who was the director of the royal gardens. He named genus, *Strelitzia*, after Charlotte who was the Duchess of Mecklenburg-Strelitz.
- The bird of paradise gets its name from the fact that its flower is made of three bright orange petals and three blue petals which are fused together into a single bud. As the flower blooms, each petal makes its debut and the resulting shape mirrors that of a tropical bird in flight.

March 6 - Tie:

- That sacred and inviolable bond which unites men of the most discordant opinions into one band of brothers, which gives but one language to men of all nations and one altar to men of all religions, is properly, from the mysterious influence it exerts, denominated the mystic tie;
- “Brethren of the Mystic Tie.”
- The expression was used by Brother Robert Burns in his farewell to the Brethren of Saint James Lodge, Tarbolton, Scotland in 1786.

Welcome to the gentlemen's club Ladies!

The poem/song

Adieu! a heart-warm fond adieu;
Dear brothers of the mystic tie!
Ye favoured, enlighten'd few,
Companions of my social joy;
Tho' I to foreign lands must hie,
Pursuing Fortune's slidd'ry ba';
With melting heart, and brimful eye,
I'll mind you still, tho' far awa.

Oft have I met your social band,
And spent the cheerful, festive night;
Oft, honour'd with supreme command,
Presided o'er the sons of light:
And by that hieroglyphic bright,
Which none but Craftsmen ever saw
Strong Mem'ry on my heart shall write
Those happy scenes, when far awa.

May Freedom, Harmony, and Love,
Unite you in the grand Design,
Beneath th' Omniscient Eye above,
The glorious Architect Divine,
That you may keep th' unerring line,
Still rising by the plummet's law,
Till Order bright completely shine,
Shall be my pray'r when far awa.

And you, farewell! whose merits claim
Justly that highest badge to wear:
Heav'n bless your honour'd noble name,
To Masonry and Scotia dear!
A last request permit me here, —
When yearly ye assemble a',
One round, I ask it with a tear,
To him, the Bard that's far awa

Number 21: The Elephant

- Number 21 or gate number 21 is the number symbolizing financial freedom.
- 21 is a hell mirror image of a heavenly number, number 12 (12:21). Which is a number (12) of creation, creativity beauty and (word or voice or sound) - Divine Governance or Authority.
- The number 13, which symbolizes Divine Promise and deliverance and 21 are closely related because 21 is freedom. 21 like 13 are natural numbers, and number 21 is an outgrowth of thirteen. Adding thirteen (Divine Promise or Providence) and eight (symbolizing a new beginning, infinity and continuity) gives us twenty-one or a number that represents a new beginning, a new level in heaven which brings about stability, agreement, symmetry and unity with Divine Love ❤️ what we call the Great Mother.
- Twenty-one 21 symbolizes not just freedom by the great rebellion leaving the bondage, and following the quest and the pursuit of purpose.
- Gate Number 21 is so powerful that it concludes two kinds of freedoms which are spiritual freedom and wealth freedom and the symbol of this is the moving swastika.
- In the colonization of Africa, though the Italians, Portuguese, Spanish, Belgians, Germans and the Dutch exploited Africa but the Mother Continent was divided mainly into two parts; English colonies and the French colonies. The French held the wealth snake or oppression in all their colonies thus French Africa was so impoverished and under developed.

LoVe, Life & Money

- We all love money (secretly or openly) but not all of us are loved by money. We must enter into a healthy relationship with money.
 - A. How can you tell if money loves you or not? Actually it is in the manner in which money comes or is presented to you. Does it come constantly and regularly, or sometimes you have it and sometimes you don't? Another, when people pay you, is it in a respectful manner or not (money wrapped up in a decent envelope with accompanying honorable note or they hand it over to you bare in a disrespectful manner like thrown at you? Another, Are you recognized, meaning paid for your labour and are you paid on time? Another, Do you get what is more equivalent to your input or you are cheated and underpaid? Another, does money often show up on your path when walking seeming dropped by somebody else? Well, that is never a sign of good luck but a curse, you pick that money up you create further lack. In fact, anything lying on the ground presented to you do not pick it up because it will bring deeper lack, ignore it and walk away because when money loves he doesn't present himself in that manner, instead he reveals his ways for you to make more money honorably, constantly, regularly and in many forms of recognition.
- We must first be in love - with money (Holy Spirit) - the god of this world, meaning money loves us and we love money!
- How, We are introduced to LOVE by the Great Mother; here we meet money as well, in all his shapes or forms!
- If you are the 1st generation to enter this space you must labour for love, 7 years of labour then you enter the gate of love: gate N° 5 and N°7.
- Once you are in love, nothing & nobody will/can remove you from love. Here money openly loves you.
- Money is a living entity: money is Life wrapped in Love! La vie est belle!
- When money loves you, he talks to you, how to open new streams, how to grow in him fit and healthy, here he is exposing also the thieves and helping you rid of bad habits that made or could make you stay within a certain bracket.
- Money comforts
- Money attracts good; it is magnetic energy
- Money collects and punishes on our behalf, from those who owe us, stole from us, whether you know they took from you or not; money shall collect & punish
- Money pursues those he loves
- Money Heals: health, herbs, spices, food, medicine, harmony
- Money smells and hears good
- Money is beauty and elegance

Love Vs Fear

Fear is curable by music, order & love !!!

- The opposite of love is fear: Most people fear running out of money period and worse during retirement
- People fear what they don't know: likewise people fear money when they don't have that healthy relationship with money or because they don't know and understand money.
- People who fear money make money errors: those errors keep them poor or within a certain bracket. What are those errors? The errors vary from thoughts, bad words, bad habits, poor distribution and just plain neglect on one's finances.
- People in fear are unable to fall in love or to learn the laws of money and keep them in order to benefit from them
- Fear is illness and death = poverty or fear of never having enough!
- Fear is disrespect = people in fear of money disrespect their spouse, colleagues, others and themselves.
- Fear is inequality = people in fear are mostly oppressive to others, they believe in superiority
- Fear is abusive = people in fear are abusive often using money to abuse others
- Fear cheats = people in fear pervert the scales and measurements and they are anti-loyal - infidelity, untrustworthy or dishonest
- Fear is lazy = people in fear pile up dirt, unwanted things, they are not hands-on or in the front line, they are not brave, they preach what they do not practice and they always want others to take their responsibility without compensation or recognizing them
- Fear is stingy = people in fear lock themselves out from progress, philanthropy and charity.
- Fear is greedy = people in fear over consume what in actual fact their body requires and even take other's portions with entitlement
- Fear is jealous = people in fear are not supportive towards the dreamers and go-getters, they pull them down
- Fear is unhealthy = people in fear get the diseases they fear if they would come upon them. They listen to every nutritionist and act in fear, exercise in fear, sleep deprived because of fear.
- Fear is ungrateful = people in fear don't have a please, sorry, thank you or a well done. They withhold good from others who deserve it!

Being Wealthy or Rich Is not by Hazard or Miracle

- If a person were to win a lottery or fall into some inheritance yet have a poor mentality, they will lose all of that money to others who are wealthy in their being.
- Once in love (complete in Holy Trinity), it doesn't mean that you pray and pops there comes money, falling into your lap, no! Getting wealthy or rich is taking the necessary steps and the discipline everyday that will get us there.
- Respect oneself will help us to demand respect from others and also to respect our money and the energy we put into making it. It won't be easy at first when people around are used to disrespecting you but you must start and be consistent.
- We don't pray for a miracle to be rich; we actually must learn good habits, behaviors of the rich and the laws of being wealthy or rich and staying there in heaven. Patience is key, do not compete also with others, your money journey is your and yours with your husband, so ignore outside noise, pace yourself, Rome was not built in one day!
- When we follow the rules of getting rich, now we can pray for more faith, tenacity, patience and discipline. Money in itself will not miraculously fall from heaven like rain or snow because it doesn't come from heaven it is printed right here on earth. Money is governed by the earthly elements soil, fire and especially water and air. Money is current. It's up to us to generate it, grow it and circulate it responsibly such that it makes multiplied returns.
- Making more money for each individual must be a clear understandable designed path. like a game of fitness or farming. For the better part we stick to that and it works but we should also keep our ears on the ground in case we must make a new or different move as money talks, and on and on it goes.
- Instinct is very important, a power woman possesses more than man. Instinct helps us to make moves at the right time that will generate profit and big returns: money chasing us: goodness and mercy following us all the days of our lives.
- Risks must be taken but better shared. When the time to take a risk comes along it doesn't appear as a risk so it often presents itself as common sense and the best option and such risks will always pay back big time, but when we take the risk knowing that we are taking a risk then we should try to share it.

External Influences

- The type of market economy for one's country for instance, is an external influence. If one is not aware of what different types of economical markets invokes internally they will fall victim. For example, even a mixed market however based on socialism and communism is a threat to an unaware mind to have fear of money, stay poor or within a certain bracket or even have limited dreams. Capitalism, as brutal as it is, it is designed to generate an idea that if one stick to the rules they stand a shot no matter their background. These markets all have benefits and thus a conscious mind has a duty to demand human rights respect and a community consciousness.
- Other influence is understanding the structure of the systems that governs our economies. People should understand from home and schools what options are available to them earlier on. An employee is a mindset for instance, as well as the Self Employed - do it all by myself mentality, and the Business minded is an entrepreneur who wants to build a business, and finally also is the Investors mentality who builds beyond just a business but create leaders and community.
- Furthermore the structure of the Money Game stands as such:
 1. Pre-game show (born rich or poor)
 2. 25years old - 35 1st quarter (employee or self employed)
 3. 34years old - 45 2nd quarter (follow a dream - purpose)
 4. Half time (45 - 50years old) re-think
 5. 50years old - 55 3rd quarter
 6. 55years old - 65years 4th quarter (you can still start here with support to create wealth but you must fight harder with your old bad habits that kept you broke in the first place but you can do it)
 7. Overtime
 8. Out of time ⌚

Money Law N°1: Thoughts & Words

- Being wealthy and rich is a mindset.

<https://plicc.org/2018/12/11/the-idea-of-wealth/>

- Positive words and thoughts makes us rich.
- Subconscious mind attracts money, opportunity, connection and alliances.
- Genius = Gene-in-us: the magic gene is the purpose gene in each person, that area of talent and excellence. Find the area where the genius comes out in you and use that to generate wealth, build a career upon that, gain new skills and open new avenues.

Money Law N°2: Talents Parable (Financial IQ)

- Generate and grow Income: sow seeds of money. Know the soil for money, the water and sun for money. Banks or storehouses are the soil. Money waters money, by constant placing new money in the store rhythmically you are watering your money. The sun is food to your money, light is the respect and the discipline you give in honoring the process, which means neglect is the opposite.
- Get Financial education (just basic and advanced if needed) and gain skills.
- Learn about forms of money; debt, assets, capital, dividends, cash flow, currency and forex trading and exchange: even if not ready to engage yet, we can educate ourselves steadily and plan towards.
- Learn about Debt and taxes (levies) because they are a huge liability off which can be turned into assets and investments with some skills.
- **Grow (multiply) your money: Financial IQ**
- Have Rich, Middle and Poor people as examples and remember their strikes and mistakes and vow not to repeat those mistakes.
- Count the money down to cents, no losses: Mathematics and Accounting. Counting is the hidden law of increase. Count your money or get someone trusted to count it.
- Close pocket holes.
- Conquer illusions
- Hide your money: don't show off (*there is a law that says what we show off we lose*). Showing off is another way of unplanned unsolicited and unwanted exchange where you lose what's good and take on what's bad from those you showed off to. (not to confuse with sharing; Sharing in good faith is good - it's all about the intent and space.)

Money Law N°3: Divide, Count & Conquer

Income

XP

Positive

Open more rivers
be creative in multiply

Distribution
good money comes back with more
Listen to money

Expenses

negative

Reduce

Do not spend carelessly

Money Law N°4: Distribution

- **Distribution is everything because it is here where we know exactly how to count and as such we gain confidence and gain good habits.**
- **Create a personal budget and respect it: money is respect, in fact money is about self respect, how we treat our money says everything about self respect and respect for our spouses.**
- **Like the nutrition entering the body, money must be well distributed in all aspects of our lives.**
- **When we master distribution we become financially healthy.**
- **Which means we can now start saving, set reachable goals, build storage, invest and or gaining on interest.**
- **Distribution also builds on our financial safety and security net.**

Money Law N°5: Goals

- Set goals for your first €100 and do the same for your first 1000 surplus you have generated from your discipline in following the rules. How to distribute it. Save how much of it or invest how much of it or buying what kind of asset that can gain you another €1000. Set goals for your first €10000, for your first €100 000 and your first €1 000 000 and on and on it goes. The focus is always into multiplying our money or else the tree dies; it is as simple as that. At first you will have to force yourself to think this way and afterwards it becomes like a part of you as brushing your teeth.
- Secondly set your goals in partnering with another. Get married and partner. **God designed Marriage to build wealth**:- in order to create empires, governments and kingdoms. Marriage is not the cure for loneliness or to have access to sex or to have children legally; to marry for such reasons is abuse of the institution. Children can be our liability if we do as we please. Marriage is sacred. A God built marriage is a rigid triangular structure to stand throughout eternity. We can ask God to connect us with our other half so we do not choose out of lust, commonalities or all sorts of ideas that may run in our minds. Your partner has a complimentary set of skills, personality, and many more things you don't have that you need to make you a multi billionaire and a better human being overall. They have also qualities that test all your love and patience just so you can be a better spirit. Marriage was design so, in order to teach us unconditional love, patience, selflessness, family, unity and power.
- Externally as well keep seeking ways to increase your alliance, strategically identify together compatible partners that you can do business with, trade with and expand to build a long enduring centuries kind of empire.
- Sharing of risk and shared financial goals is smart and responsible behavior.
- **Risk is lack of control**, so if you can have the know-how in the design, legalities, product, geopolitics, demand, sales, stats with profit estimations and functioning as well as time frame of the business deal, then you have control, partners come with capital, skills and knowledge needed, that increases the control aspect of things and the safety and security is guaranteed which eliminates the risk but ensure returns.
- Planning and practical portfolio such as Insurances is part and parcel of literal steps taken to reach specific financial goals, just like savings, assets acquiring, investments and hedge funds. These items must be thought through planned and chosen well. Not all insurance is good but most insurance is absolutely beneficial.

Money Law N°6: Control & Discipline

- Control is basically not giving this responsibility to anybody else, each person must have control over their finances or else be punished by the laws of money. Being married doesn't exempt you from this responsibility.
- Discipline is about exactly that, simply discipline. Once you know the rules and the laws now you ought to stick to them for the rest of your life. It's like staying away from substance abuse or taking on a journey to physical health and fitness.
- Controls of an entrepreneur;
 1. Control over one's Income
 2. Control over one's Expenses
 3. Control over one's Asset failure
 4. Control over one's Liabilities
 5. Control over one's Financial education/Management and
 6. Control over one's Insurance
 7. Control over Illusions
